*Lundhags*

# WELCOME TO LUNDHAGS

Through outdoor activities we empower and inspire people to live a sustainable life.

Our mission is to empower and inspire people to live a sustainable life. We do that through our products, services like repairation, our ambassadors, our communication and events.

values; authentic, nordic, sustainable and functional this creates a foundation to build a solid and strong brand.

## LONG HISTORY OF ALL-YEAR TREKKING

Lundhags was founded in 1932 by the shoemaker Jonas Lundhag. He started out making boots that he peddled to local outdoorsmen in Jämtland, Sweden. Lundhags boots soon became synonymous with comfort, functionality and quality. We still remain true to the same guiding principles. Each Lundhags product stems from a passion for fostering the tradition of manufacturing quality products for the Nordic outdoors. This is why, 87 years on, Lundhags is still an icon.

Our heritage is essential and together with our

## SUSTAINABILITY – A PART OF OUR DNA

From the very beginning Jonas Lundhag had a vision of making boots that lasted a life-time. This is still our vision – we want to be your life-long companion, on the trails. Simply put, products that you can and want to use for a long time. We also try, as much as possible, to manufacture products that can be repaired. In our opinion, this is the real definition of sustainability.

To live a sustainable life is also about well-being, to choose an activehealthy life in the nature. Breathing fresh air, explore the outdoors, experience the nature – finding peace of mind.

## LUNDHAGS MATERIAL GUIDE – STRIVING TO BECOME TRULY ENVIRONMENTAL FRIENDLY

### Recycled Material

We believe in using recycled material when possible. For instance, we use 100% recycled polyester in our LPC material and 90% recycled polyamide in our LN-Stretch.

### Organic Cotton

There are several important differences between traditionally and organically grown cotton. Growing organic cotton uses less water, eliminates hazardous pesticides and the use of manufactured fertilisers, protecting not only the farmers handling the cotton as well as your skin when wearing the final garment. organic cotton is not genetically modified. We use 100% organic cotton in our main fabric Lundhags Polyester Cotton Mix.

### Fluorocarbon Free

Today the complete range is free from fluorocarbons, including any DWR treatment. Most of the Lundhags range has been fluorocarbon free for a long time. In 2014 we launched our fluorocarbon free hard-shells.

### Mulesing Free Merino

All Merino wool used in Lundhags are mulesing free.

---

# SUSTAINABLE IN EVERY WAY

---

## PRODUCTS THAT LAST OVER TIME

Sustainability has been a natural part of the Lundhags DNA since our beginnings 86 years ago. Lundhags develops and sells functional products with a long life, a high level of repairability, and with materials of the highest quality. We strive to minimise the negative effects of our business. The most important is to manufacture products that our user can and want to have for a long time.

## MATERIAL

The choice of material in our products is important from several aspects. The material must partly fulfil its function for the product to have a reason to exist, but the material should also have the least environmental impact – presently, these two parameters are almost always at opposite ends. The aim is for all of our materials to not have any negative environmental effects. It will take a long time and much hard work and focus to get there. We cannot reach this goal without our suppliers. Good relationships with our subcontractors are a must for us to succeed in issues of sustainability.

## ASSORTMENT

Lundhags assortment should have a clear focus, each product should fulfil its purpose and preferably have a broad area of usage. We work with a high level of carry-over products, creating an assurance throughout all segments. Our production is proportionately evenly distributed throughout the year, creating a more even balance on our suppliers and more regular transports.

## DEVELOPMENT PROCESS

Now we introduce the entire collection for 2020 at the same time, instead of on two separate occasions. We give ourselves more time to develop the products and test them in an entirely different way than what we usually do. We can release products that are completely developed and ready for introduction. The goal is for each new product to be a future classic. By presenting the entire collection on one and the same occasion, instead of working with two or four seasons, we reduce the number of meetings, the number of travels and the number of sales samples.

# MATERIALS

## LUNDHAGS POLYESTER COTTON MIX (LPC)

LPC is our own versatile material, a recycled and organic blend. Our LPC material composition is 65% certified, recycled polyester, and 35% organic cotton from Turkey.

LPC provides good air circulation and ventilation, as well as an optimized microclimate between the different layers. Breathability, flexibility, windproofness, durability, strength and UV protection, combined with the tight weave of the fabric, form an unbeatable combination for an active outdoor lifestyle.

We have concluded that the properties of LPC work best when impregnated. The LPC material and the impregnation are free from fluorocarbons. Re-impregnating, without heat or complicated procedures, can easily be performed in your own washing machine.

Toko Eco Bionic Finish is also very durable: the impregnation retains the same function over an extended period, even after intensive usage and numerous washings. There are several categories, which all have different functions in focus:

### LPC 155 RM/OC (WAX)

The most lightweight and supple variant of LPC. This fabric also exists with a waxed finish for enhanced weather protection and a more rugged feel.

Content: 65% Polyester – recycled, 35% Cotton – organic.

Weight: 155 g/m<sup>2</sup>

### LPC 181 RM/OC

Plain LPC combined with mechanical stretch for additional comfort.

Content: (65% Polyester – recycled, 35% Cotton – organic).

Weight: 181 g/m<sup>2</sup>

### LPC 205 RM/OC

The fabric works well in light rain and is fast drying if wet due to heavy rain. Tightly woven twisted yarn in warp and weft is wind resistant and makes the material more durable. Good UV protection. This fabric also exists in a waxed finish for enhanced weather protection and a more rugged feel.

Content: 65% Polyester – recycled, 35% Cotton – organic.

Weight: 205 g/m<sup>2</sup>

## LUNDHAGS INSULATION

Lundhags insulation program Viik provides warmth and protection all seasons. Choose from lightweight and packable pieces, perfect for layering to more insulated options to keep you warm on colder days or while having a rest. All made in recycled fabrics in subtle clean design.

### FABRICS AND BENEFITS

We continue to use the same lightweight yet durable, wind resistant recycled Polyester Ripstop throughout the range. It comes with a PFC-free DWR, which helps repel water and dirt.

The PrimaLoft padding is incredibly soft, lightweight and breathable with excellent water repellency, allowing the user to remain dry, warm and comfortable even during the most extreme conditions. It is mainly made of recycled fibres from post-consumer materials.

We use and mix a broad range of padding weights to provide the optimum garments for all-year round usage.

Recycled, recyclable, fluorocarbon free and Bluesign® approved

**Country of origin:** Vietnam

For colder days, worn by itself or as a layering piece, the Viik Hoodie brings you warmth and wind protection. Our body mapping padding construction provides the right amount of warmth for increased comfort. If you chose to wear it by itself, the DWR treatment will protect you in light rain, weather you're in the outdoors or urban environments.

- Recycled polyester windblock body material
- PrimaLoft body mapping padding construction
- Adjustment at front of hood
- Zippered opening with an internal placket
- One zippered chest pocket
- Two zippered hand pockets
- Elasticated sleeve cuffs
- Cord adjustment at hem
- Articulated sleeves
- Hanger loop at neck seam

A LIFE-LONG COMPANION

# SHELL BOOT TECHNOLOGY

Our Shell Boots are developed for all-year trekking in demanding climate like in the Nordics. The bottom is made of waterproof cellular rubber bottom and the shaft of high quality leather. They last a long time, they are easy to repair, they dry quickly if they get wet, they are comfortable and stable. The original is our 1-layer Shell Boots and the more technical are the 3-layers Shell Boots - even more stability, comfort and insulation.

THIS IS OUR 3-LAYERS SHELL BOOTS WITH ALL THE FUNCTIONAL DETAILS.

## 3-LAYER SHELL BOOTS

The 1-layer boots have one layer of leather, whereas the 3-layer boots has 3 layers; first one layer of leather then a layer of Ariaprene, which adds insulation and support, and another layer of leather on the inside of the shaft.

Our 3-layer boots use Certech EXP, which is just 1.5 mm thick, and a layer of EVA and microfiber for stability and insulation.

The 3-layer boot is the perfect choice for users carrying heavier loads, who like to hike off-trail, or simply want that extra bit of protection, insulation and support. All 3-layer boots feature the new Certech EXP bottom, which provides stability and keeps your feet dry while remaining flexible without adding extra weight to the boot.

### SYNCRO II MS HIGH

**Article number:** 1013759  
**Sizes/weight:** 40-48/910g  
**Shaft height:** 31 cm  
**Lace length:** 200 cm  
**Material:** Heinen Terracare full grain leather, HFC heel grip, Vibram Traction sole, TPU toe cap, Liba Smart TPU 1,5 mm, Polyurethane heel cushion, Ariaprene COR 2 mm, Ariaprene MAX 4 mm  
**Country of origin:** Portugal

An advanced and technical boot. Syncro II is a comfortable 3-layer shell boot. The shaft is manufactured in Heinen Terracare full-grain leather and closed cell Ariaprene foam which gives good insulation and high comfort. The outsole has been upgraded with a PU heel wedge and TPU toe protection.

- Lower parts in Certech Exp (1.5 mm Liba Smart, 2 mm EVA, 1 mm Micro fibre)
- Extra heel grip with Heel Fit Control (HFC™)
- Vibram Traction sole with a powerful grip
- New Beta Pro – insole
- New heel wedge in shock absorbing Polyurethane
- Shaft height 31 cm

## VANDRA WS HIGH

Article number: 1020161

Sizes/weight: 36-42/690 g

Last: Opti Ws

Shaft height: 26 cm

Lace length: 165 cm

Material: Certech 3.0 Cellular rubber base, Heinen Terracare full grain leather, Vibram Traction sole

Country of origin: EU

SS20 FW20 36 37 38 39 40 41 42

709 Gold Brown

Vandra Ws High is a 1-layer shell boot in a modern design, with an adapted women's last. It is a stable boot made from full-grain. Vandra has a padded top collar and is developed according to the shell principle. It offers a protective and high shell layer that is easily adaptable to the activity and temperature. A 1-layer boot is lighter and more flexible, breathes better, and can be more easily repaired compared to a 3-layer boot.

- Shaft made from full-grain leather
- Single size shaft for the best fit
- Cellular rubber base with Certech 3.0-construction
- Vibram Traction sole with a powerful grip
- 4 mm EVA for insulation and cushioning
- Opti-last, a slightly wider last with a lower instep and generous toe box
- Sturdy pull loops on the sides of the shaft
- Padded collar

# OMNI BOOTS

Our collection of all-round hiking shoes and boots for light hikes and everyday use. With a focus on instant comfort, functional quality and products for all seasons. Our Omni collection does not compromise on quality and Nordic authenticity. All our footwear are made in Europe to the highest manufacturing standards using only the best components and materials.

With world class craftsmanship as the main ingredient.

Material: Liba Smart TPU 1.5 mm, Corradi Suede leather, TPU Film, Vibram Pepe Outsole

Country of origin: EU

SS20 FW20 36 37 38 39 40 41 42 43 44 45 46 47 48

680 Tea Green

Bjerg Mid is a durable hiking boot. Made in Italian Corradi Suede leather from northern European cow hides. For increased comfort, the upper around the ankle is padded and we have created a new insole that is highly breathable and cushioning thanks to the innovative material Arneflex. A layer of Libasmart expanded TPU protects the toe and a thin layer of TPU film reminiscent of our classic shell boots provides an extra layer of side protection against water and abrasion.

- Italian suede leather from Corradi
- Vibram approach outsole
- TPU film
- LibaSmart toe protection
- Breathable and cushioning Arneflex footbed

# TREKKING PACKS FOR ALL-YEAR TREKKING

The Scandinavian way of hiking does not necessarily mean that you move about on well-tramped hiking paths or ski along tracked trails. You might just as well find yourself on untracked terrain, with a map and compass in your hands. On a route that you have planned yourself.

We believe that Scandinavian trekking demands uncompromising equipment. That we make a choice in every detail of our products. And in these choices, we always believe in prioritizing durability and function ahead of low weight. With our new backpack series launched in 2018, we somehow did the opposite of the industry and the popular trends of lightweight trekking. For us, weight is just one parameter of many.

With our roots in the demanding mountain environment of Jämtland, Sweden, we want to offer products that can deal with all imaginable conditions. Even in the mountains. Even when a backpack buckle is handled with a pair of thick winter gloves on. With exclusive material choices, rugged fabrics, and true metal buckles, we have filled our backpacks

with our history. And our philosophy of creating world-class outdoor products. Products that you can trust, for a very long time.

## USER-FRIENDLY BACKPACKS – TESTED & APPROVED

The design and construction of Lundhags backpacks are based on our collective experience and know-how from years of year-around outdoor activities. If our products work in the most challenging, cold and windy conditions, such as where glove-friendly operation is a must, they will also work during the summer. Therefore, we always strive to find small, sometimes unique solutions that make it easier to also operate your backpack during harder winter conditions.

## MATERIALS – SUSTAINABLE & FUNCTIONAL

Our backpack materials are carefully selected to match our sustainability criteria. This means not only being bluesign® approved, but also using

organic content or being fluorocarbon-free. Just as important are the long-lasting properties that will last several year of usage. Hence, our materials have completed stringent real life performance tests and in the laboratory to qualify. After all, a backpack that lasts is the best investment you can make.

## OUR CHOICE OF TRIMS – SAFETY FIRST

Even the most relaxed trek can turn into a more challenging adventure. Our mission is to ensure that your experience, together with your choice of equipment, will result in you enjoying the outdoors even during more difficult outings. The materials, trims and seams should withstand years of use and not leave you stranded with, for example, a broken zipper or buckle. Therefore, we only work with high quality suppliers and we prefer oversized detailing instead of thinking minimalistic. Because it simply works better. Oversized zippers, well-dimensioned pull-tabs, large zipper pullers and sufficiently sized buckles are important factors when the weather turns bad, you are lost and perhaps out of energy.

## ZIPPERS

We use RC (Racquet coil) zippers from YKK. Specially designed for luggage applications where resistance

to abrasion is a must. This zipper has been precision engineered to meet the toughest performance requirements and because the zipper is usually the weakest link in a backpack, our choice here is critical. We usually use the toughest size #10 on all main entrances for extra-long lasting functionality.

## BUCKLES

Generally, we use hardwearing metal components whenever possible. Made from aircraft grade aluminium, they are durable and extremely strong aluminium stamping, meaning that they won't fail during a long trek where help is far away.

## WEBBINGS

We only use premium quality 420×420D polyamide webbings supported by internally weaved core lines for extra tensile strength, which makes the webbing extra strong compared to weight ratio.

## SEWING THREAD

Our 210D polyamide bonded sewing thread is for any item that needs the highest seam strength. It is specially developed for high quality backpacks that require a high tenacity and where broken seams must be avoided. Superior abrasion resistance.

### GNAUR 90/75/60

Our most advanced backpack with stability and comfort for long treks or when travelling. With stability, durability and easy-to-operate features, you will become close friends for many years to come. All parts of the carrying system can be repaired or replaced.

### GNAUR MAIN FEATURES

- Levelled top puller loops for individual adaptation
- Duo density cushioned shoulder straps for maximum weight equalization
- D-rings on shoulder straps as attachment points
- Movable chest strap
- Duo density cushioned hipbelt for increased load comfort capacity
- Side hip stabilizer
- Easily accessible water protected hipbelt pockets with zip closure
- Floating top lid with two zippered compartments and with elastic side panels
- Large front opening
- Robust front haul handle
- Hole webbings with numerous durable attachment points
- Expandable zippered side pockets
- Elastic wand pockets
- Dual side compressions
- Two section backpack with zippered divider wall
- Compression strap under lid for tent fastening
- Extendable collar for additional capacity with double-pull drawcords
- Internal hanging and zippered security pocket with elastic car key holder
- Hydration system compatible
- Rain cover with side attachment hooks in the bottom compartment
- Indestructible buckles made of aircraft aluminium
- Glove-friendly zipper pullers
- Prepared to attach Jomlen 25, Gnaur +10 or Knul 7 items for additional capacity

## GNAUR 90 RL

Article number: 1210001

Sizes/weight: 90 L/3 200 g

Back length: RL 52-46 cm

Basic measurements: 71 x 34 x 32 cm

**Material:** Main material: Lundhags Polyester Cotton Mix (LPC) Ripstop 231 RM/OC, (65% Polyester – recycled, 35% Cotton – organic). PU-coating >1500 mm. Reinforcement: LP 300, 100% Polyester, bluesign® approved. PU-coating >1500 mm. Liner: LP 120, 100% Polyester, bluesign® approved. PU-coating >1000 mm. Product, including DWR 100% FC-Free.

Country of origin: Vietnam

LPC

SS20 FW20 90 L

900 Black

Gnaur has the weight to support big loads and carry comfortably. Made from our durable Lundhags Polyester and Cotton mix fabric, Gnaur reflects our belief in slightly heavier backpacks. All parts from the suspension system can be repaired or replaced. And not only does Gnaur use rugged aluminium buckles and fasteners, it also accepts smaller bags from Lundhags for additional capacity. If you are searching for a backpack that you can have for years to come, the Gnaur series is your friend for life.

- Rigid and torsion stable rod & aluminium stay framework
- Adjustable carrying system in size RL (Regular-Long: 52-46 cm)

## GNAUR & GNEIK – HOW TO FIT THE BACK PACK

MEASURE YOUR BACK TO FIND OUT IF YOU NEED REGULAR-LONG (RL) OR REGULAR-SHORT (RS)

To fit your Gnaur carrying system correctly, measure your back length, using a measuring tape, from your seventh vertebra down to the point of your spine where you are levelled with the top of your hip bone. If your back is 46-52 cm you need RL, and if it is 42-48 cm you need RS.

1. Measure the back
2. If the back is 46-52 cm its a Regular long (RL)
3. If the back is 42-48 cm its a regular short (RS)
4. Adjust the back pack in the back

- PE-board and sponge back stabilizer
- Top puller adjustment
- Link ergonomic shoulder straps for maximum comfort
- Forest knife attachment on the shoulder strap
- Movable and detachable chest strap
- Cushioned hipbelt pillows for increased load comfort capacity
- Detachable hipbelt
- Rolltop opening with dual guided fastening buckles
- Robust front haul handle
- Hole webbings for numerous durable attachment points
- Zippered front pocket
- Front forest axe compartment
- Concealable upper and lower trekking pole & ice axe attachment loops
- Wand pockets

## DOVRE 40

**Article number:** 1240520

**Sizes/weight:** 40 L/1520 g

**Material:** 600D Polyester, 300D Polyrip

**Country of origin:** Vietnam

A light day tour backpack for shorter tours, travels or daily commute. Dovre has a minimalist design and a softer back panel, shoulder straps with comfort zone and a ventilated air zone via mesh cushions on the back. Generous top opening and zipper in the bottom section for easier access. Fixed suspension and several roomy pockets.

- Light day tour backpack
- Open above and below for easy access
- Elastic cord on the front to attach equipment
- Internal and external storage pockets
- Dividable middle wall
- Concealed bellow pockets on the sides
- Mesh side pockets
- Chest strap
- Comfort zone shoulder straps

900 Black	•	•	

A simple, clean daypack with one main compartment and ergonomic shoulder straps. Made from bluesign® approved polyester, this pack can be added onto larger trekking backpacks or simply rolled and stuffed into a pack. Gnaur +10 is compatible as a chest pack and an excursion backpack on Lundhags Gnaur and Gneik backpacks, and many other large backpacks. The lack of features make this bag perfect for travelling when you need a small carry-on or a bag for all your valuables.

- Tuck away padded ergonomic shoulder straps
- Zippered main opening
- Indestructible buckles made of aircraft aluminium
- Detachable sitting mat to be used on wet/cold ground
- Glove-friendly zipper pullers
- Compatible as chest pack and as excursion backpack with Lundhags Gnaur, Gneik and with many others too

## TOOL CASE

Article number: 1256068

Size/weight: 0,5 L/70 g

Basic measurements: 15,5 x 23 x 15 cm

**Material:** Lundhags Polyester Cotton mix 436 RM/OC (65% Polyester – Recycled, 35% Cotton – Organic). PU-coating >1 500 mm. PU-coating >1 500 mm. Liner: LP 120, 100% Polyester, bluesign® approved. PU-coating >1 000 mm. Product including DWR 100% FC-Free.

Country of origin: Vietnam

LPC

An handy and versatile case to organize and protect your essentials when trekking, travelling or in your everyday life.

Minimum order of 3.

- Handy and useful
- Zippered main compartment

# MATERIAL GUIDE

## BOOTS

### CERTECH® EXP

Certech® Exp is Lundhags own shell construction for the lower parts of the boots. A technology built-up in 3-layers. The outer layer is the durable, but light material Liba Smart, the midlayer uses Eva for insulation and shock absorption, and the inner layer is micro fiber, which lines the entire inner for best comfort. Together, the layers in Certech® Exp create a light and durable protection against everything that a pair of boots can be exposed to.

### CERTECH®

Cellular Rubber Technology is the manufacturing technology behind Lundhags cellular rubber bottom. Cellular rubber is a yeast rubber with numerous micro air bubbles that provide a light and flexible waterproof material. To describe the differences in rubber, each version is numbered 2.0–5.0, with the highest number representing a more stable and insulating design. The same construction is available in both Regular and Opti lasts. The Ws versions have slightly softer soles and thinner insulation for a more customized flex.

### ARIAPRENE

Ariaprene is a high performance synthetic rubber material. It is light, elastic, and closed-celled, meaning that our products gather less water and dry quicker. Ariaprene is also used for its insulating and shock absorbing properties, and it is free from harmful chemicals.

### LIBA SMART

Liba Smart is made of Expanded TPU (thermoplastic polyuretan). A material which out performs rubber in most tests. A light, hard wearing protection that is waterproof, flexible and 100% recyclable. Liba Smart is UV- and ozone-resistant.

### INSOLE

The insole is built from a 3 mm fiber material and has a built-in steel shank. Our strongest models use Texon T70, a fiber material with a polymer core for stability and torsional rigidity.

### EVA ISOLATION

An extra layer of EVA with a hardness of 35 ShA is used to improve cushioning and resistance to the cold. The thickness together with the insole effects the flex of the boot. Thickness of 4 or 6 mm.

### CLARINO® MICROFIBER

Polyurethane/Polyamide microfibers provide a light, flexible material with great durability. It is used as a lining material in both Certech® constructions and 3-layer shafts in the most exposed places. Thickness 1.0 mm or 1.4 mm.

### VIBRAM® TRACTION SOLE

Our outer soles are made of Vibram®, built with EVA to provide cushioning and a rolling step. The traction pattern is exclusive for Lundhags' boots. Available in Megagript compound for grip and durability.

### LUNDHAGS COMMANDO SOLE

Our new development, a classical rough patterned sole with a medium soft rubber compound that provides grip and durability.

### VIBRAM® CURCUMA

Self cleaning track pattern outsole with Tront rubber compound and toe protection. 25% lighter thanks to faceted mould.

### FULL GRAIN LEATHER

Full grain leather uses the best parts of the hide. Nubuck is a full grain leather that has been gently brushed to give the surface a different character. The Nubuck surface breathes better and is easier to re-impregnate. The leather is impregnated directly at the tannery and no fluorocarbons are used in the process, which takes place in a closed system. Thicknesses of 2.0–2.2 mm.

### TPU TOECAP

The developed TPU toecap forms a strong attachment of the sole to the shoe by distributing forces over a larger area. The TPU toecap also protects against wear and extends the life of the shoe.

### PERWANGER® SPLIT LEATHER

A finer split leather from cow that is robust, has excellent breathability, is water repellent and hardwearing. Thicknesses of 1.8–2.0 mm.

### NEOPRENE

Neoprene is used in our 3-layer shafts for stability without absorbing moisture. The material spreads impacts and protects the foot from sharp objects. Used in different layers depending on the desired effect. Thickness of 4 mm.

### HEEL FIT CONTROL

An extra cushion that covers the seam between the bottom and shaft to provide an improved heel grip and stability.

### RINGS AND HOOKS

Our rings/hooks and rivets are manufactured from iron or copper/iron alloys for maximum resistance. We use a nickel-free, high resistance treatment to provide additional protection against corrosion.

### CAMBRELLE®

100% Polyamide produces a lining material with a high level of wear resistance and moisture absorption. Weight: 150 g/m<sup>2</sup>.

### FELT

The felt in the foot beds and inner boot consists of 70% Wool and 30% Polyester. Thickness of 3 or 5 mm.

### AEROGEL

Aerogel is an innovative insulation material that we use inside our warmest shell boot, the Skare Expedition. Millions of air pockets form a thermal blockade, locking out the cold and keeping the warmth inside, thus making it a fantastic insulator. PrimaLoft® Gold Insulation Aerogel retains an average of 96% of its original thermal performance when used by active feet, which is perfect for our insoles.

### VIBRAM MOTTARONE – ARCTIC GRIP

Vibram Mottarone is our winter outsole. Our grip lugs use an innovative technology called Arctic grip, which is specifically engineered to perform on ice, giving you excellent traction in winter conditions. The toe has a protective bumper and the heel is undercut to improve downhill braking. The self cleaning rubber bottom has a great mix lightweight and durability and is made from an Icetrek rubber compound, providing excellent performance in very low temperatures.

## CLOTHING

LPC = LUNDHAGS POLYESTER AND COTTON MIX

RM = RECYCLED MATERIAL

OC = ORGANIC COTTON

LN = LUNDHAGS NYLON

### LPC RM/OC

Lundhags Polyester Cotton mix with Recycled Material and Organic Cotton. Water resistant when combined with TOKO DWR treatment. The fabric works well in light rain and is fast drying if wet due to heavy rain. Tightly woven twisted yarn in warp and weft is wind resistant and makes the material durable. The fabric construction provides good UV protection when used in strong sunlight.

### LPC 155 RM/OC

Lundhags Polyester Cotton mix, Recycled Material, Organic Cotton. Composition: (65% Polyester – recycled, 35% Cotton – organic). Weight: 155 g/m<sup>2</sup>.

### LPC 181 RM/OC

Lundhags Polyester Cotton mix, Recycled Material, Organic Cotton. Composition: (65% Polyester – recycled, 35% Cotton – organic). Mechanical stretch. Weight: 181 g/m<sup>2</sup>.

### LPC 205 RM/OC

Lundhags Polyester Cotton mix, Recycled Material, Organic Cotton. Composition: 65% Recycled Polyester, 35% Organic Cotton. Weight: 205 g/m<sup>2</sup>.

### LPC 155 RM/OC WAX

Lundhags Polyester Cotton mix with waxed surface, Recycled Material, Organic Cotton. Composition: 65% Recycled Polyester, 35% Organic Cotton. Weight: 155 g/m<sup>2</sup>.

### LN-STRETCH 255 RM

Recycled softshell stretch, for freedom of movement. A very durable and hard-wearing material with very high tear strength. Wind and water repellent surface. A permanent elastic and durable material. LN-strech 255 RM = Lundhags Nylon Stretch, Recycled Material. Composition: 90% Recycled Polyamide, 10% Polyurethane. Weight: 255 g/m<sup>2</sup>.

### LUNDHAGS WATERPROOF 168

100% Polyamide with Zethar membrane and Polyester circular knit backing. 20 000 mm water column, 16 000 g/m<sup>2</sup>/24H. Weight: 168 g/m<sup>2</sup>.

### SCHOELLER®

Double fabric construction with synthetic fibers on the outside and functional fibers on the inside for rapid moisture transport. A durable and hard-wearing material with high tear strength. Wind and water repellent surface. A permanent elastic and durable material. Composition: 96% Polyamide 4% Elastane, bluesign® approved) Vikt: 202gr/m<sup>2</sup>.

### POLYESTER RIPSTOP RM

A windproof, water repellent lightweight yet strong and durable fabric. Composition: 100% Recycled polyester. Weight: 53 g/m<sup>2</sup>.

### SCHOELLER® KEPROTEC® ECO

A fabric with an extremely high durability and tear strength. Used as reinforcement

fabric on some of the garments in the collection. An extremely abrasion and tear resistant fabric with Kevlar® for top quality protection. Composition: 76% Polyamide, 14% AR (Kevlar®), 10% PU, bluesign® approved. Weight: 177 g/m<sup>2</sup>.

### MERINO WOOL MIX

Soft, thin, naturally breathable and high quality Wool. Mulesing free. Provides a warming and cooling effect even when wet. Merino wool has an excellent warmth-to-weight ratio and naturally controls odors without any added chemicals. 53% Wool-Merino, mulesing free Wool, 44% Polyester, 3% Elastan – Spandex. Micron number 18,5, 280gr/m<sup>2</sup>

### PRIMALOFT® ECO

PrimaLoft Black: 100% Recycled Polyester. PrimaLoft Gold: 30% Recycled Polyester.

### TENCEL®

Tencel® is a fiber made of cellulose from fast growing coppice. It provides the material with a soft and comfortable surface that cools and effectively transports moisture away from body.

### FLOUROCARBON FREE

Fluorocarbons are harmful to our environment and living organisms. Lundhags strive to develop products friendly to our environment and aim for all our garments are 100% flouorocarbon-free.

## PACKS & BAGS

### LPC RIPSTOP 231 RM/OC

Lundhags Polyester Cotton Mix with Recycled Material and Organic Cotton. The surface is water resistant when combined with TOKO DWR treatment and is waterproof thanks to a PU-coating. Durable and hardwearing canvas suitable for packs and bags. Composition: 65% Recycled Polyester, 35% Organic Cotton. PU-coating >1500 mm. Product, including DWR 100% FC-Free. Weight 231 g/m<sup>2</sup>.

### LP 300

Lundhags Polyester is a material that is highly resistant to destructive UV rays. Our 300D Polyester fabric is coated with PU for added waterproofing. It is hardwearing and copes well with tough conditions. Composition: 100% Polyester, bluesign® approved (FC Free DWR). PU-coating >1500 mm. Weight: 300 g/m<sup>2</sup>.

### LP 120

Lundhags Polyester is a material that is highly resistant to destructive UV rays. Our 120D Polyester fabric is coated with PU for added waterproofing. It is hardwearing and copes well with tough conditions. Composition: 100% Polyester, bluesign® approved. PU-coating >1000 mm. Weight: 120 g/m<sup>2</sup>.
